Allowable Subject Matter

Applicant has circumvented the obviousness-type double patenting rejection outlined in the correspondence dated July 12, 2004 by canceling claim 1, rewriting claim 3 such that it includes all of the limitations of original claims 1 and 3, and changing the dependency of all claims originally dependent from claim 1.

Claims 2-17 are now considered to be allowable as Narisawa still appears to represent the most germane prior art.

Arai et al., U.S. patent # 5,514,741 actually teaches a curable composition that mirrors the instant invention insofar as it comprises a silicon alkoxide condensate and a fluoroalkyl-substituted silane, and a silanol group-terminated polydiorganosiloxane (this component would provide the same structure to a cured product as would the alkoxy group-terminated congener mandated by Applicant). On the other hand, the ratio of linear polymer to silicon alkoxide condensate does not at all correspond to that presently claimed. Indeed, the composition taught by the reference requires the linear polymer as the base component added in the largest amount. Further the curable composition to Arai contains aluminum hydroxide as an essential ingredient and it is believed that this material possibly would have a deleterious impact on the ability of a water drop to slide down a surface coated with said composition.

Japanese document no. 2001-172417 discloses a water-repellant film comprising a silicon alkoxide hydrolyzate and a fluoroalkyl-substituted silane. There is no mention, however, of a component analogous to component (b).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Marc S. Zimmer whose telephone number is 571-272-1096. The examiner can normally be reached on Monday-Friday 8:00-4:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Randy Gulakowski can be reached on 571-272-1302. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
